COURSE OVERVIEW

Legal drafting forms the backbone of the legal profession. Precision, clarity, and articulation in drafting legal documents can determine success or failure in the courtroom, corporate transactions, and public policy. To improve their drafting skills, law students often take unpaid internships, bearing the costs of accommodation and other basic necessities in metropolitan cities. This financial burden often turns their learning experience into a struggle for survival rather than a true opportunity for growth.

It has also been observed that law students who lack strong drafting skills fail to meet the professional standards of excellence. Consequently, they risk losing cases, damaging their reputation, and, ultimately, causing losses to their clients. For fresh advocates, mastering drafting and litigation skills typically takes 5 to 10 years. While litigation expertise comes through personal experience, legal drafting is a skill that can be learned and refined through structured practice.

The New Certificate Course on Advanced Legal Drafting (Version 3.0) with Live Classes offers a comprehensive and upgraded curriculum tailored for legal professionals, law students, and enthusiasts. It is designed to enhance drafting proficiency while ensuring alignment with contemporary legal developments.

The course is in collaboration with SRM University, Sonepat.
