The issue raised in the present petition is quite important and relevant and highlights the lack of centres which cater to organ transplants in the State of Andhra Pradesh.

Learned counsel for the petitioner has drawn our attention to the fact that out of 80 teaching hospitals only 9 cater to such a facility and even those are only in the private sector and further that none of the hospitals in the Government set-up provide for such a facility.

It is also stated that while thousands of people are in the queue waiting for an organ transplant, there are only 100 donors identified who are ready and willing to donate.

It is stated that the lack of donors is either on account of lack of facilities throughout the State or lack of awareness amongst the general public regarding the concept of an organ transplant which has the effect of saving lives.

This petition was filed in the year 2016 but no response has been filed till now.

Learned Government Pleader for the Medical & Health Department states that some time be given so that an effective reply can be filed in this regard.

List on 12.11.2025.
